

Re-imagining Well-Being: Digitally Connecting the Dots...

Harnessing Creative Solutions towards a Society for All Ages
February 9, 2021 10:00 AM - 11:15AM EST

Zoom Link is found [here](#)
Passcode: 026099

Background

Statistics show that by the year 2050, there will be approximately 1.5 billion persons over the age of 65 - **the "AgeQuake"**.

This side event will consider perspectives from a multi-strategic group of stakeholders from 4 UN Regions to present success stories and commentary on how Information and Communication Technology (ICT) can impact disaster relief in a time of COVID and create a bridge with older persons in expanding worldviews to create social change and a society for all ages and abilities.

The 5th Edition of the Music as a Global Resource: A Compendium of Solutions for Cultural, Social, Health, Educational, Environmental and Economic Issues, is a 225-page examination of success stories from UN Member States. An emphasis will be placed on how ICT is a catalyst for engaging diverse populations in addressing the complex issues such as social justice, gender empowerment, youth resilience and poverty alleviation

This session is part of the UN Commission for Social Development.

Speakers

Moderator & Digital

Mr. John Gong

Use of Robots, Athena Technologies, Inc. CA

Ageing

Arq. Anna Prokudina, Moscow

Arq. Nabil Abdallah, Tanzania
